

Gwendal Le Grand works as an Associate Professor in the Computer Science and Network Department of ENST (Ecole Nationale Supérieure des Télécommunications) since 2001. He received his PhD in computer science from the University of Paris 6 in July 2001 and graduated as a telecommunications engineer of the Institut National des Télécommunications, Evry, France, in 1997. His main research interests are oriented towards wireless and ad hoc networking, security of information systems, communication protocols, and quality of service. He is involved in several national and European projects (ITEA, RNRT, IST) in computer networking, security and security of critical infrastructures. In the CIP field, he has been previously involved in the IST FP5 ACIP roadmap project that studied critical infrastructure protection and is now involved in CI2RCO, IRRIS and DESEREC. He is teaching advanced networks at ENST.
