

Sandro Bologna received the Laurea degree in Physics from the University of Roma in 1972. He has been initially involved in the design of computer based systems for safety and risk management. He is currently interested in modelling and vulnerability analysis of complex technological networks. In his scientific career he has covered different managing positions, both as Project Manager and as Head of Research Units. He has been one of the promoters of the Working Group on Critical Infrastructure Protection at the Innovation and Technology Department of the Italian Prime Minister Office.
